

THE CHRONICLE

VOL. XI. NO. 40.

CROSSFIELD, ALBERTA, FRIDAY, OCTOBER 19th, 1918.

PRICE \$1.50 A YEAR.

Why Canada must borrow money to carry on

Because Canada has put her hand to the plow and will not turn back:—

—our country is in the war on the side of liberty and justice and will stay in it till complete victory is won and the unspeakable Hun is smashed and beaten to the ground;

—a nation at war must make tremendous expenditures in cash to keep up her armies and supply them with munitions, food and clothing;

—Canada must finance many millions of dollars of export trade in food, munitions and supplies which Britain and our allies must have on credit;

—for these purposes Canada must

borrow hundreds of millions of dollars—

And, this money must be borrowed from the people of Canada:—

Therefore, Canada will presently come to her people for a new Victory Loan to carry on.

+ + +

Canadians will loan the money by again buying Victory Bonds.

The national safety, the national honor and the national well-being require that each and every Canadian shall do his duty by lending to the nation every cent he can spare for this purpose.

Be ready when the call comes to see your country through in its great war work

Issued by Canada's Victory Loan Committee in co-operation with the Minister of Finance of the Dominion of Canada

CROSSFIELD BOYS AND GIRLS' PIG CLUB FAIR

The first annual show or Fair in connection with the above was held on the local Agricultural Show Grounds on Saturday evening, when pigs owned by the members of the Pig Club were exhibited. Prizes were awarded to those which showed

the most care and attention during the four months that had passed in the care of the members of the Club. Professor Elliott of the Olds Agricultural School was the Judge, and in round after round he was greatly pleased with the results of the boys and girls' labors.

The first part of the program con-

sisted of various kinds of sports, until the time came for the pig show. Prof. Elliott, Mr. S. H. Bray, Mr. S. Bray, Jr., and H. G. Scholfield. The enthusiasm was maintained throughout and especially great when Prof. Elliott appeared and proceeded to judge the pigs, which took up quite a little time. The pigs belonging to

Roy, Dick and Eileen Patmore, came in for special mention being fine specimens of the Berkshire sow.

After Prof. Elliott had gone the rounds of the pens and gave his

views on several of the pens, he was brought out of their pens and placed within an enclosure and he gave his views at to what is required of a

pure-bred Berkshire pig, and gave further advice as to the future care and feeding of the animals. Cakes, candy and fruit were freely disposed of to all the children present. At the close of the fair, Mr. Scholfield (who is President of the Club) and Prof. Elliott on behalf of the boys and girls and called for cheers, and right heartily did the boys and girls expand their voices in a hearty cheer. Mr. Scholfield called for cheers for Mr. Bray (who is Manager of the Club), and three times more did those youngsters give vent to their feelings. Both Mr. Bray and Mr. Scholfield returned thence, after which the children went their various ways, having spent one good afternoon. The parents of the children who attended also said they had a very profitable afternoon.

The following is a list of the prize winners:

Best pair of Berkshires sows.—1st, Dick and Eileen Patmore; 2nd, Melvin Johnson; 3rd, Melvin, Opal and Vivian Brown; 4th, Carl Becker; 5th, J. Bell; 6th, Achil and Francis Demers; 7th, John and Melvin Becker; 8th, Fred and Francis Hays; 9th, Scholfield.

Best individual Berkshiro Sow.—1st, Roy Patmore; 2nd, Dick Patmore; 3rd, Melvin Brown; 4th, Melvin and Vivian Brown; 5th, Achil Demers; 6th, John Becker.

News in Brief

Excited crowds in the streets of Berlin tore special editions of the newspapers containing the speech of Prince Maximilian, the new chancellor from the hands of the news dealers. Everywhere shouts of "peace has come," "peace at last," were heard.

Two weeks are a short period in a war of more than four years, but what has happened in the past two weeks is equal to the progress of about three of the four years. The next two weeks are likely to see the beginning of the general evacuation of France by the Germans.

Several ships arrived in a Canadian port this week conveying between four and five thousand returned soldiers. Nearly a thousand are "hospital walking cases," for whom berths have been specially erected in the ships under the supervision of the medical authorities. About 3,300 are "ordinary discharge cases," and there are three or four hundred soldier's wives and children and 150 officers, who are returning.

A United States shoemaker recently hit upon the idea of advertising his wares by the construction of a colos- boot. It weighs five hundred pounds, stands seven and a half feet in height, is fourteen and a half feet in length, with a sole four feet eight inches in width. It is, in fact, fourteen times as large as an ordinary shoe, and needless to say, is a size that is not stocked. A sample boot is seen resting on the giant. As already stated, it was made for advertising purposes, and in the town where it is to be seen has certainly attracted a fair share of attention.

A strange case of what is believed to be a malingering has occurred at Reading, England. A gipsy passed Grade I., when called up presented himself at the barracks doubled up and hobbling, with a stick in each hand. Several medical men subjected him to a severe examination and pronounced him fit, but the man could not be made to straighten himself. Later, specialists were called in, and the man underwent electric shocks, varying in degrees, without flinching. In all twelve doctors declared him fit for service. He was therefore ordered the usual course of training, but he refused to stand up. During the week-end he was placed in a draft for Ireland, but owing to his still doubled up state he rode to the station, whilst his comrades walked.

ANNOUNCING A NEW

CHEVROLET

"Baby Grand" Touring Car

THE demand for Chevrolet performance in a larger and more powerful car is met by the Baby Grand Touring Car. Chevrolet engineers have, in this car, perfected many new features that give it a quick get-away, surplus power on hills, and reliability under all road conditions.

On account of its power, flexibility, comfort and easy clutch, this model appeals to lady drivers. The car is extremely well finished, nicely appointed and fully equipped.

EXCLUSIVE FEATURES

Front Seats—Semi-canilever, making portable riding cars.

Rear Axle—Three-quarter floating type

Spur gear differential gears.

Starting and Driving—Electric Auto

Literature—Remy.

Ignition—Remy.

Local and General

Thanksgiving Day was a very in town.

Mrs. Jose is spending a vacation visiting friends in Calgary.

Mr. W. J. McIntosh and family, of Eckville, late of Crossfield, came by auto on Saturday evening to spend the week end renewing old acquaintances.

Sid Willis has been appointed Justice of the Peace for the village. More power to your right arm! Sidney Willis, J.P.

Changes are still taking place in town. J. Fiske moved to the rooms over the Ford Garage last week end, the Potter family moved into the house vacated by the Fikes, whilst Sid Willis and family moved into the house Mr. Potter and family left.

**Freemen Buy Bonds.
Slaves Wear Them!**

Pte B. Furber returned to town on Saturday last from England. Mrs. Furber should have been with him, but somehow or other she made a miss. Anyhow we hope to see her in the near future. L. Fisher also returned, but went through to Carstairs.

UNION CHURCH, CROSSFIELD.

Rev. M. E. Wiggins, of Airdrie, will preach in Crossfield, next Sunday night. The pastor, Rev. R. K. Swenerton, will preach at Rooney, 11 a.m., Elbow, 3 p.m. Do not forget the Harvest Home Services will be held Sunday, Oct. 27th, at 11 a.m. and 7:30 p.m.

Pte Fleming of the 12th Mounted and Pte Taren of the 31st Batt., both returned veterans, have been on a visit to Mr. W. Urquhart. Both were pals of Teddy Urquhart's, who was the last to bid them farewell when they left the lines overseas. Dr. and Mrs. Bishop spent Thanksgiving with W. Urquhart.

We call our readers' attention to the coming Chautauqua Festival which takes place in Crossfield on Nov. 9th, 11th and 12th, for fuller particulars see the advt. on another page. As the program announces "Three joyous days of music, education, inspiration, entertainment. Tickets now on sale, may be had at the Drug Store.

Mr. and Mrs. J. T. Armstrong received a wire on Saturday informing them that their son, Sgt. J. T. Armstrong, M.M., 2nd C.M.R., had been admitted Oct. 5th, to Edmonton Military Hospital (London), gun shot wound head and hand.

He had just returned to firing line, having been wounded Aug. 8th, and previously at the great battle of Ypres, June 1916. Last year he was decorated by King George for bravery in the field and later mentioned in Battalion Orders for courage and determination in storming the enemy's trenches at Hill 70, Jan. 12th, 1918.

See Dr. M. Mecklenburg, the Eye Sight Expert about your eyes, will again be at the Hotel, Crossfield, on Tuesday, October 29th.

Fellow Canadians!

YOU who spend as much or more on your tobacco, who indulge in the good things of life as you ever did—you who buy what you want, to eat what you fancy, go where you please—who deny yourselves nothing—*how much real thought do you give to the winning of the war?*

"You know what we have to put up with. Do you think we could stand it all—the homesickness, the cold misery, and the terrible fighting—if we dreamed 'over there' that you were trifling with this war, that you were spending money on frivolous things?"

"Don't you see that every time you spend a dollar on a thing you don't really need you are using the labor of a man who should be either fighting or making something that will help us—your soldiers—to fight?"

"Oh, you chaps with money in your pockets and comfort in your homes and love of ease cantering you souls,—if you could know as I know that war means, you'd stink yourselves down to the bare necessities, so that Canada's money and Canada's material and Canada's labor could all go into guns and shells and equipment for our boys in France to fight with!"

HUNS ARE ADEPTS IN PREPARING HORRORS FOR THE HELL OF WAR

INVENTED POISON GAS ABOUT EIGHT YEARS AGO

That the Germans Long Since Had in Mind the Barbarous Plan Of Making Use of Poisonous Gas to Overcome Their Enemies Is Well Established

That the Hun long ago had in mind the barbarous idea of using poison gas to overcome their enemies is a well established fact, confirmed by their own testimony. The first application of the use of such agents was the use of gas to protect them patented by the Krupp factory in 1910. A London illustrated paper of August 10 of that year gave figures of the gas first produced, its cost and manner for use in the field and a fanciful illustration of the piece in action firing from a slight elevation upon a belt of Ordnance corps who are writing in agony under the strange attack.

Thus, eight years ago, in the quiet old days that now seem like ancient history, the Hun had already boasted of their poison gas and preparing to superimpose a new horror upon the hell of war. The general secretary of the International Military men noted it as a theoretical possibility of artillery, academic interest, somewhat like the Chinese "sink-pots," never dreaming that it was contemplated as actual warfare against civilized nations, but thinking it possible only against rustics, savages, hordes who were incapable of maneuver and no tenderness for wounded or captives. War departments saw the designs and the brief notices published in German newspapers like the *Wochenschrift der Zeitung*, clapped them out, filed them away in their pigeon holes and forgot them.

Berlin never dreamt over the invention. Thus went the world following the Kaiser's trip to the Orient and his posing as a new Redeemer to revivify the Modern world. "Berlin," said the *Wochenschrift*, "is more than a dream and the military coterie that dominates the German people was actively trying to please its master."

The doctrine that might makes right was firmly entrenched in Germany and all means were recognized as legitimate to extend her power.

Surely in the German laboratories the Herr professors were perfecting the new application of poison gas in warfare. Surely because even the Hague Peace Convention had condemned the use of such horrid weapons. In the positions of the Hun of 1907 and 1908, the delegates, recognizing the growing part likely to be played by chemistry in the science of explosives, insisted that there was a new use of such weapons to be contrary to international law. Little the Hun cared, however, for any law, human or divine, that did interfere with their ambitions and here their arguments were continued on the new offensive weapon.

General Friedrich von Bernhardi laid down in quite frankly in his book, with unconscious cynicism, he has entitled "How Germany May Win," Writing in September, 1914:

"Krupp has lately constructed a contrivance for throwing bombs that probably will be a military service. The bombs will be made of explosive and fixed to a guiding rod. Is inserted into the loaded cannon at the muzzle, with the guiding rod fixed to a wire, which will draw the bomb to sit on the muzzle, whence, on discharge, it is thrown forward with sufficient accuracy at a high rate of elevation."

"The projectile weighing more than eighty kilograms (170 pounds) attains a maximum range of 300 meters (990 feet) and owing to its very small size can pass through behind any cover. Its effects is solely due to the fire, smoke and air pressure produced by the enormous explosive charge. Nothing can knock it alive in its proximity. The suffocating smoke and the poisonous gases will render it probably impossible for any one to outrun or pass behind it, which some of these bombs have exploded. Perhaps obstacles can also be destroyed by these projectiles and men can be driven from the defense of the trench. The importance of this new arm can only be established by experiments."

The experiments were continued with redoubled ardor during all the time that the kaiser was rattling his sabre, threatening France in North Africa, belittling Russia, annexing Austria in her annexation of Bosnia and Herzegovina and obtaining from England for the sake of peace valuable concessions regarding the Bagdad railway. The new offensive substance, it was found, could be projected from containers as well as from a hand grenade. But it remained unused to the great vexation of military men, who delight in no task better than the killing of their enemies.

The experiments were continued with redoubled ardor during all the time that the kaiser was rattling his sabre, threatening France in North Africa, belittling Russia, annexing Austria in her annexation of Bosnia and Herzegovina and obtaining from England for the sake of peace valuable concessions regarding the Bagdad railway. The new offensive substance, it was found, could be projected from containers as well as from a hand grenade. But it remained unused to the great vexation of military men, who delight in no task better than the killing of their enemies.

This began the great war. Sweeping forward irresistibly, the Germans expected to take Paris in a military parade. It was quite a shock when

they were forced back to the Marne. Then King George's continental army hung on to their right flank all that hard winter of 1914, establishing themselves at Ypres like a thorn in the German side.

An Exciting Sea Battle

Story of a Submarine Attack on Two Vessels and the Result

Life aboard a merchant vessel is far more exciting now than in pre-war days.

The following story tells of an encounter with a submarine:

When they first sighted the submarine, it was just above the water in the morning, about 100 yards off the British ship.

The submarine fired a torpedo at the British ship, which exploded.

The British ship was hit and sank.

The submarine then fired another torpedo at the British ship.

The British ship was hit again and sank.

The submarine then fired another torpedo at the British ship.

The British ship was hit again and sank.

The submarine then fired another torpedo at the British ship.

The British ship was hit again and sank.

CANADA HAS A PROUD RECORD

COVERING FOUR YEARS OF WAR

Dominion Has Furnished an Army of Over Four Hundred and Fifty Thousand, and of These Forty-three Thousand Have Given Their Lives to the Cause of Freedom

Canada's achievements in the four years of the war are briefly reviewed. The total cost of the war up to date is \$75,000,000, and the amount of money given to the Canadian government for the war is \$36,000,000. When the accounts for 1917 were made up, the amount of the national debt before the war stood at \$75,000,000.

Canada entered the war with a regular army of 300,000 men, and the same number were sent overseas.

Canada's soldiers to the number of 43,000 have given their lives to the cause of freedom.

On the 1st of April, 1915, Canada entered the war, and the number of men sent to the front was 30,000.

On the 1st of July, 1915, Canada entered the war, and the number of men sent to the front was 30,000.

On the 1st of October, 1915, Canada entered the war, and the number of men sent to the front was 30,000.

On the 1st of January, 1916, Canada entered the war, and the number of men sent to the front was 30,000.

On the 1st of April, 1916, Canada entered the war, and the number of men sent to the front was 30,000.

Without Pure Blood Health Is Impossible

Owing to laudable actions of the kid and mother, this would be the last child with disease germs that imperil health.

The first symptoms are back-ache, dizziness, headaches, lack of energy. Act quickly if you would avoid the terrible ravage of chronic kidney complaints. Get Dr. Hamilton's Pill. This pill cures kidney and liver troubles for all time to come. No medicine relieves so promptly, eases so thoroughly. For good blood, eat more vegetables; but above all, use that grand health-bringing medicine Dr. Hamilton's Pill. Get a 25c box today.

Carmen's Messenger

— BY —
HAROLD BINDLOSS

WARD, LOCK & CO., LIMITED
London, Melbourne, and Toronto

(Continued)

"I'm rather busy just now," he said. "For all that, I can be of any use to you, Mr.—"

Foster thought he overdid it by pretending to forget his name, but he mended.

"Foster. You'll recollect I brought you a packet, and as I'm going back to Canada soon, I imagined I might take Miss Austin. Daly, reply. You can see that they thought me a reliable messenger."

"Miss Austin obviously did so,"

"Doesn't this imply that Daly shared her good opinion?" Foster asked.

Graham glanced at him sharply and then picked up a letter and studied it, but Foster imagined he wanted time to think. He had made the plan, he supposed, because of what he knew more than the other supposed; but the rest needed care.

"You expect to meet Daly when you get back to Canada," Graham inquired, and Foster, who saw that he was cautious, wondered whether he was alarmed.

"Or, no, I expect to meet him before you imply that he's in England."

"Don't you know he is?" Foster rejoined.

Graham knocked the ash off his cigarette and looked at him curiously. His appearance was commonplace; he had a slight stoop, and was not especially tall. Foster felt he might prove dangerous.

"I don't know where he is just now. Do you?"

"Yes, I do," Foster. "I believe I could find him if I tried."

The other was silent for the next few moments and Foster waited with some anxiety. It was preferable when someone much like himself was found out, but if Graham imagined he knew nothing, he would hesitate about informing him. He had been欺骗ed while he played the part of a companion who had been made use of by the rest of the gang; he must imply that they had to some extent been used.

"To tell the truth, I haven't heard from Daly for a month," Graham replied. "This has disadvantages and I own that I'd like to know what he is doing."

"Then it looks as if I was better informed. Mr. Daly's engaged in some private business?"

"Just so," Foster answered, smiling. "He imagines it will turn out profitable, but I expect it will take up much of his time."

"But—no," said Graham, and stopped.

Foster made a sign of comprehension. "You feel he ought to have some business that might interfere with his duty to the rest of us?"

"What do you know about his duty?"

"Well," said Foster, "I frankly don't know very much. In fact, it looks as if your Canadian friends didn't trust him very far, but just now I'm going to make myself understand my job. No doubt, that was wisest, although it's not flattering. Anyhow, I brought you a packet with a special message, which you ought to verify before sending back any confidential message to the people it came from by me."

He made a bold venture, but said that he was right, for Graham knitted his brows, as if he was thinking hard. Then he said: "Very well,

As it happens, there are some papers I would like to send and if you don't mind mailing them, I'll give you a letter to Daly and another to Miss Austin."

"Miss Austin, of course, will pass the letter to him."

"That's understood," Graham agreed.

Foster carelessly lighted a fresh cigarette and Graham, waiting for words opened a safe and took out one or two papers that Foster could not see well. But the latter had done well, for he had hoped another few minutes would be in the possession of papers that might throw a useful light upon the plot. Yet his strain was beginning to tell as his hand was beginning to tremble when he watched his companion write.

A lamp with a broken mantle flickered above Graham's head, casting a faint glow on the outer office the door of which was open, was dark, and the building was strangely quiet. No sound rose from the narrow street below, which can rise a little in the distance between houses. Foster, putting his hand in his pocket as if to feel for matches, took the small Browning pistol that had been given him. He was not afraid of Graham, but somehow might come in. At length the man sealed two envelopes and put them beside his writing.

"If you cannot find Daly, to me, when you get back, I'll be glad to bring him to you."

"I don't know yet; I haven't looked up the steamship companies' notices," Foster answered, and as soon as he had spoken, saw that he had made another mistake.

He had let Graham to believe he was going at once; indeed, this was his excuse for offering to take a message, but he remembered that in order to get the best passage, he had to book it necessary to book one's passage some time in advance. He thought Graham had marked the slip when his face was expressionless.

"I don't think the letters carried on for long," he said.

"Certainly not," Foster agreed. "I'll play along with you, I suppose. I'll bring him back. However, I've kept you from your business and must get you back to it."

Graham did not move, and the letters were out of Foster's reach.

"You have got your instructions from Gascoyne and know what to do you have any trouble on your journey?"

Foster felt embarrassed. He did not know if Gascoyne was the man whom he had met in Canada, but risk not a fresh mistake. Besides it was possible that there was not such a person among the other's friends and that the man was not here. However, he said boldly, "I can get all the instructions that are needed when I meet Daly. Give me the letter."

"I don't think it. It would be better to wait until we hear what Gascoyne says to you, since you haven't seen him as I thought. He may be coming to get you and send you the other documents. Suppose you come back about this time tomorrow."

Foster, who feared he was found out, said that he agreed, he would find the office closed and Graham gone; unless perhaps the fellow waited for him on or two of his visits. Foster, however, had no such accomplices. He knew he was playing a dangerous game, but he carried Alice Featherstone's glove.

"No, he's not. I'm willing to do you a favor, particularly as I want something to show my friends. In fact, I brought him a packet with a note from his old employer, who had been his master."

"I might be in serious danger if somebody else came in. Still, he must not look anxious and he quietly fixed his eyes on Graham's face.

(To be Continued.)

Pork Restrictions Removed

Owing to the success of the hog production campaign in Canada and the corresponding increase in the consumption of both countries in the consumption of pork, the Canada food board has removed the restrictions applying to public eating places on the sale of hams which may now be served at any time by such places operating under a Canada food board license. New exports of pork from the Dominion totalled 125,000,000 pounds per annum, or 571 per cent over the five year pre-war average.

Brown Sugar Only in Detroit

Only brown sugar may be sold in Detroit until further notice. The regulation includes retail stores and dealers. The reason for the order is that a large amount of brown sugar remains on hand despite the campaign to get rid of it before August, and that the order will place all dealers on an equal basis.

Why the Caterpillar?

It Seems to Be One of Nature's Greatest Mysteries

Any householder who is a lover of trees or shrubbery, and possesses a lingering notion that the world was created for the special benefit of man, may have a strong desire to consider the caterpillar as he watches the repulsive creatures swarm over his green world. To express the truth and his object, generally, a naturalist would have suggested that you meet him in the hotel lobby, or on the cars, at the street corner, but always when you haven't a gun, money, or pliers.

We may, if we like, question nature's benevolence in creating such an insect as the caterpillar, as we fritter around the trees trying to burn and otherwise get rid of it, but we eventually have to admit that it is a creature that deserves to have a home, goes to a great deal of ingenuity to produce them, and produces them on a quantity scale exceeding all the promises of the most enterprising of inventors.

The subject again leads us to a doot as to the fundamental intelligence of nature in the caterpillar business, in view of the fact that it is a devious means of destroying it. Nature makes them with one hand, kills them with the other, and they are everywhere to be found.

In the endless variety of caterpillars that develop into moths and butterflies, there is a waste of life and effort that is staggering to contemplate as are the acts of destruction.

Billions upon billions come into existence, of which but an infinitesimal percentage reach the final stage of development, and millions of helpless eggs from the arctic to the tropics which hatch and produce more billions.

The young larvae sustain beetles, centipedes, and animals eat them flies lay eggs in them, parasites and contagious diseases sweep them off, and a host of other insects, the farmer, hardly makes the slightest impression on them with his torches and poisons.

How long has he eye on the caterpillar and has learned much of its ways. Some idea of its menace and possibilities may be gained from the following figures: A single grain of wheat, by the time it is fifty days old, consumes three-quarters of a pound of leaves and stems over 80,000 times its weight in so short a time is glutinous without parallel.

The caterpillar, unstrained, would eat a person's head to the bone, weighing at birth one-twentieth of a grain has, by the time it is fifty days old, consumed three-quarters of a pound of leaves and stems over 80,000 times its weight in so short a time is glutinous without parallel.

The caterpillar, unstrained, would eat a person's head to the bone, weighing at birth one-twentieth of a grain has, by the time it is fifty days old, consumed three-quarters of a pound of leaves and stems over 80,000 times its weight in so short a time is glutinous without parallel.

Chautauqua

After the success of last season's Chautauqua the Committee feel they need only to tell the Crossfield public that,

**NOVEMBER 9, 11 and 12,
ARE THE DATES FOR THIS YEAR'S FESTIVAL**

ATTRACTIOnS.—When you study the program for this year you are impressed by the fact that there is not a single number which is not of the very highest class. And you will realize that you can not afford to miss even one.

SEE THE SPECIAL PRINTED PROGRAMS.

PLACE.—Programs will be given, as last year, both in Church and Hall, each Afternoon and Evening. A complete list of Entertainments will be given at each place.

TICKETS.—Tickets are now on sale at the Drug Store, and by Canvassers. All reservations will be made at the Drug Store. Purchase your tickets now and get them reserved to suit you.

**Adults Season Ticket, Reserved \$2.50; Children, do., \$1.50.
Adults, Single Admission, Afternoon 75c; Evening \$1.00.
Children, Single Admission, One Half-price.**

GENERAL COMMENTS.

ARTISTES WHO WILL ENTERTAIN YOU:

H. RUTHVEN MacDONALD Saturday, Nov. 9th
Dr. FREDERIC POOLE

Mr. MacDonald's ability as a singer has made him well-known in all of Canada. His program will be the treat of a life-time.

Dr. Poole, whose life work has been in China, is a forceful and delightful speaker. His lecture on China will be very interesting.

HAMPTON COURT SINGERS Monday, Nov. 11th
CAPTAIN WOOD BRIGGS, of the Texas National Guard.

The Hampton Court Singers present a style of entertainment entirely new. Each singer an artiste, and collectively their music will please you.

Captain Wood Briggs, who has been sent by the U.S. Government to lecture in support of the Allied cause, presents the issues of the present war in a very stirring and forceful manner.

LADIES FESTIVAL ORCHESTRA Tuesday, Nov. 12th
MAJOR G. W. KERBY

Ladies Festival Orchestra is composed of six talented young ladies. Their program consists of orchestral numbers, readings, songs, solos and duets. Your only regret, after hearing them will be, that it will be another year before Chautauqua comes again.

Dr. Kerby is too well-known by all need comment. His subject "The War and the New Day," is enough to cause each and every one to want to hear him.

The Committee wish to state that all money left after expenses are paid will be donated to the Red Cross Society.

BUY CONTINUED PROSPERITY

Before our last Victory Loan financial experts were dubious as to the outlook for Canada. She could not borrow abroad. It was necessary that she have a large available capital to finance credits for British and foreign war orders. Canada was thrown on her own resources and appealed to her citizens.

The remarkable over-subscription of the 1917 Victory Loan completely changed the uncertain outlook which prevailed. It gave a new impetus to agriculture, commerce and prosperity. It invigorated our efforts in the war. It allowed our provincial Governments, municipal and other borrowers to finance their requirements at home. In short, it gave another lease of life to the activities of the Dominion.

The Victory Loan of 1918 will accomplish the same purposes. Upon the ready response of the large and small investor, depends the immediate economic future of Canada. Everyone's prosperity is involved.

Prepare to buy continued Prosperity in Victory Bonds.

Slaves Wear Them!

Local and General

Don't forget the Auction Sale at E. L. Bell's, on Tuesday next, at 10:30 a.m. One mile S. of Ingis and three miles W. of Lockwood P.O.

The Chautauqua Festival program this year offers you good, clean, wholesome, entertainment and instruction. Lecturers of international reputation. There will be plenty of fun and good singing and real music both vocal and instrumental.

Clarence G. Harris, formerly of Crossfield, has been killed in action on Aug. 20, in the Chateau Thierry battles. He enlisted with the 126 Inf. Co., M., 32 Div. Michigan Guardsmen, Sept. 17th, 1917, and went to France July 7th, 1918, and into immediate action.
